Forecast for Thursday 11 Jan 2024

Weather: Dry and rather cloudy. Clouds thinning and breaking this morning with some lengthy spells of sunshine across western ranges, more in the way of cloud over the Cairngorms but high Munro tops may stand above it.

Chance of cloud-free hill tops above 800m: 40% increasing 80% by midday across western ranges.

Low cloud and visibility: Broken cloud bases 400-600 metres, lifting and breaking during the morning with western ranges largely clear of cloud by midday. More in the way of cloud persisting over the Cairngorms but perhaps sunny on high Munro tops. Good visibilities, locally excellent across western ranges and higher Munros.

Met Office Aberdeen Meteorologist's View
Severe wind chill across the higher summits at first, but improving through the day as the winds ease.

Forecast for Friday 12 Jan 2024
Weather: Dry with clear spells overnight, followed by a bright day with some lengthy sunny spells, although clouds increasing across western ranges during the afternoon to give a few light showers, wintry over the summits. Clouding over across all ranges during the evening with some patchy light rain in the west later.

Maximum wind: Southwesterly 10-15 mph increasing 40 gust 50 mph later

Chance of cloud-free hill tops above 800m: 80% lowering to 30% across western ranges during the afternoon.

Low cloud and visibility: Mainly small amounts of cloud, but broken cloud developing across western ranges during the afternoon with bases 400-600 metres. Clouds becoming more widespread later in the evening. Good visibilities, becoming moderate or poor at times in the showers then rain later.

Temperature: **Glens:** Minus 4 Celsius rising to 5 Celsius.
At 800m: Zero rising to 2 Celsius.
Freezing level: 800 metres rising above the summits during the evening.
